...life killer
...a year while we are in the sixth extinction
...center or a dump! #DontNukeTheClimate
One plant. One year. #BodyCount
"Diablo Canyon sucks in more than 1.5 billion fish larvae a year, most of which die."
Each year Diablo Canyon nuke plant draws more than a billion early stage fish into it's cooling system - most die.
This system, called once-through cooling, does significant damage to ecosystems. Biologists have estimated that Diablo Canyon sucks in more than 1.5 billion fish larvae a year, most of which do not survive.
Diablo Canyon uses seawater cooling system...heated water into ocean...kills billions of fish eggs/larvae yr [sfgate.com/business/article](https://www.sfgate.com/business/article)
...into the cove 20 degrees (F) hotter, devoid of any life. Each year of operation, the plant sucks in more than a billion fish in early life stages while killing vast amounts of other marine life have been killed and 1.5 billion more will die annually through 2025, foundation of life in our oceans.

Licensed TO KILL

How the nuclear power industry destroys endangered marine wildlife and ocean habitat to save money

Diablo Canyon nuclear power plant is a life killer
That is NOT how we fight climate change. The estimated to kill roughly 1.5 billion fish in
center or a dump! #DontNukeTheClimate The billions of marine life killed by Once Through Cooling (OTC)
One plant. One year. #BodyCount estimated 1.5 billion fish in early life stages each year

"Diablo Canyon sucks in more than 1.5 billion fish larvae a year, most of which die."
Each year Diablo Canyon nuke plant draws more than a billion early stage fish into its cooling system - most die.

Diablo Canyon uses seawater cooling system heated water into ocean...kills billions of fish eggs/larvae yr
This system, called once-through cooling, does significant damage to ecosystems. Biologists have estimated that Diablo Canyon sucks in more than 1.5 billion fish larvae a year, most of which do not survive.

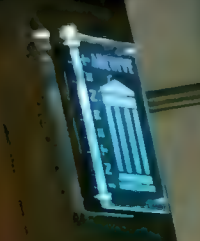

Diablo Canyon uses seawater cooling system heated water into ocean...kills billions of fish eggs/larvae yr
Another problem was that the once-through system that pumps water from coastal waters into the plant and then dumps it back into the ocean. Each year of operation, the plant sucks in more than a billion fish in early life stages while killing vast amounts of other marine life have been killed and 1.5 billion more will die annually through 2025.

Licensed TO KILL
How the nuclear power industry destroys endangered marine wildlife and ocean habitat to save money

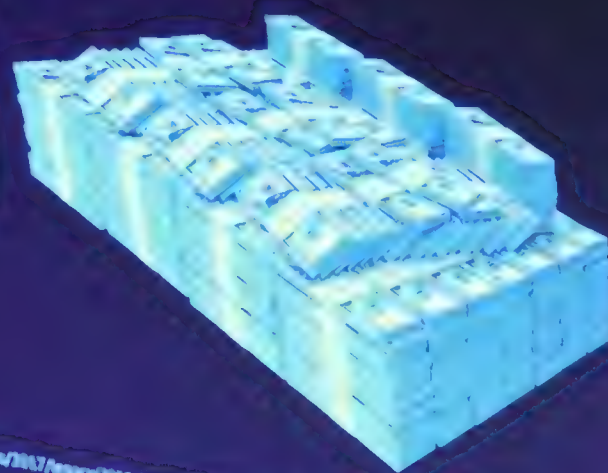

about 1.5 billion fish eggs
said this surge of warm water sucked in annually and many die

into the cove 20 degrees (F) hotter, devoid of any life
Each year of operation, the plant sucks in more than a billion fish in early life stages while killing vast amounts of other marine life have been killed and 1.5 billion more will die annually through 2025.
